1995-1996

TRAPPER AND FUR HARVEST REPORT

Montana State Library
3 0864 1006 9540 5

PREFACE

1995-1996 TRAPPING AND FUR HARVEST REPORT

Survey Approach

A trapping and fur harvest survey questionnaire was mailed to all resident and nonresident Trapper's license holders. Questionnaires were returned from 829 (41%) of the 2,004 people who purchased a trapper's license during the 1995-1996 trapping season. Expanded estimates of furbearer trapping, hunting, and harvest activities were made from the returned sample.

Definitions

TRAPPERS .....Total number of people who set traps for the given species
TRAP DAYS .....The sum, for all traps set, of the number of days each trap was set
CATCH .....Total number of animals of given species caught by all trappers
TR DAYS / CATCH .....Trap days per animal caught, defined as total trap days divided by total catch
TRAP OR HUNTERS .....Total number of people who participated in trapping and/or hunting and/or houndsman activity
TOTAL HARVEST .....Total number of animals of a given species taken by trapping and hunting and houndsman activities
MEAN HARVEST .....Total harvest divided by number of trap or hunters
SPECIES % COMP. .....An abbreviation for species percent composition which is defined as catch for individual species divided by total catch for all species and multiplied by 100

Explanations

This report for the 1995-1996 trapping and furbearer season is summarized in the same format as last year's report for the 1994-1995 season. However, the survey questionaire was changed. Rather than have the trappers compute number of trap days by species and county, as for the 1994-1995 and 1993-1994 seasons, the 1995-1996 survey asked trappers to report the number of traps or snares set, and the number of days they were set. Trap days were then computed from these supplied figures.

(CONTINUED)

Several changes were made in the trapping and fur harvest survey, analysis, and report for 1992-1993. One major change was that data were collected by county and estimates were reported by county and fur trapping district. In reports for the trapping seasons 1989-1990 through 1991-1992, Deer, elk, bear, and lion hunting districts were used and estimates were reported by administrative region. Reports previous to 1989-1990 used trapping districts which have been discontinued. The second major change was the addition of six species of furbearers to the survey and report. The six species added were marten, fisher, wolverine, bobcat, lynx, and otter. These six species require harvest registration forms. The registration forms have been the primary source of information for these species in the past. The inclusion of these species in the survey will give additional information on effort. Harvest estimates for the six "registered" species will not always agree exactly with the numbers registered, because this report gives estimates made from a sample of all trappers.

Another major change in the survey and report for 1992-1993 was the addition of hunting and houndsman activities and harvest. Also, the questionnaire beginning with the 1993-1994 season was simplified in the section requesting trapping effort, and this may have resulted in more accurate reporting than in the previous survey. This may explain some of the increase in trap days reported.

The relative precision of the estimate increases with the size of the estimate. Trapping district estimates have greater relative precision than county estimates and the statewide estimates have the greatest relative precision.

Questionnaire response data with missing or invalid county information was still used in the analysis and is reported as "DIST. UNKNOWN"
